

We are a place where individuals with disabilities can live and grow.

Our Residential Program at Bishop Grady Villas provides housing, individualized support, supervision, and training services to individuals with intellectual and developmental disabilities at our beautiful, assisted living community in Saint Cloud, Florida.

Our Program is designed to address the needs of the entire person. By getting to know the individuals we serve, we are able to encourage them to use their God-given gifts to achieve greater independence, physical and emotional well-being and spiritual growth.

Residents are guided through activities assisting them to develop, maintain, and improve independent living skills, such as personal health and hygiene, social, employment and adaptive skills, and household management. Direct Support Professionals assist residents with the development and implementation of individualized plans of support. These plans provide opportunities for community integration and socialization including volunteer opportunities, shopping, recreation, social outings, and religious services.
